HU31030**CORDLESS SOLDERING IRON**

- No 220V => no risk associated with the current.
- 30W: high power for a small device.
- Unlike gas soldering irons, this does not involve any flame. Fire is not permitted in garages for obvious safety reasons.
- No adjustment as with gas irons.
- No ordering and shipping of gas (speaking logistically, shipping gas is problematic. e.g. by plane)
- No cable. Very mobile with a high runtime.
- Precision tip for fine solders (connectors, etc.)
- Universal tip for soldering cables (e.g: cabling a trailer hitch)
- Tip for heat-shrink sheaths: Does not come into contact with the sheath so it doesn't melt it.
- Its heating speed makes work easier: No need to heat the iron 10-15 minutes before starting work. Here it heats up in 10-15 SECONDS.
- Case remains cold throughout the operation.
